1st strand cDNA was primed with a Not1-oligo(dT) primer. Five prime end enriched, double-strand cDNA was digested with Not I and cloned into the Not I and EcoR V sites of the pCMVSPORT 6 vector. Library was normalized. Library was constructed by Life Technologies, a division of Invitrogen.

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                  ......ataaaaagagcaaaaaaaa 1679

is Sequence 1, Application US/09700397
patent No. 6664383
is GENERAL INFORMATION:
is APPLICANT: Onco Pinamaccutical Co., Ltd.
is TITLE OF INVENTION: No. 6664382e1 Polypeptides, cDNA encoding the same, and use of TITLE OF INVENTION: NO. 6664382e1 Polypeptides, cURRENT APPLICATION NUMBER: US/09/700,397.
CURRENT APPLICATION NUMBER: US/09/700,397.
PRIOR APPLICATION NUMBER: UP 10-131815
pRIOR PILING DATE: 1998-05-14
pRIOR PAPLICATION NUMBER: PCT/JP99/02485
is NUMBER: 1999-05-13
is NUMBER: Patentin Version 3.0
is SEQ ID NOS: 19
is SEQ ID NOS: 19
                                                                                                                                                                                                                                                                                                                                                                                           nge

Application US/09135080

Patent No. 6423827

GENERAL INFORMATION:
APPLICANT: Levitt, Pat R.
APPLICANT: Fischer, Itzhak
APPLICANT: Zhukareva, Victoria
TITLE OF INVENTION: Limbic System-Associated Membrane
TITLE OF INVENTION: Limbic System-Associated Membrane
CORRESPONDENCE ADDRESS:
ADDRESSEE: Dechert Price & Rhoads
STREET: 997 Lenox Drive, Building 3, Suite 210
CONTY: Lawrenceville
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              COMPUTER READBLE FORM:
MEDIUM TYPE: Diskette
COMPUTER: IBM Compatible
OPERATING SYSTEM: DOS
SOFTWARE: FASTSEQ for Windows Version 2.0
CURRENT APPLICATION DATA:
APPLICATION NUMBER: US/09/135,080
FILING DATE: 17-AUG-1998
CLASSIFICATION: 424
PRIOR APPLICATION DATA:
APPLICATION NUMBER: 08/414,657
FILING DATE: 31-MAR-1995
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              1165 TTGAT 1169
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       TTAAT 1073
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            USA
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                08543
